

2020 I/I Inspection Project

The Town of Dedham Engineering Department is pleased to announce that the 2020 I/I Inspection Project is ongoing since March of 2020. This project will involve the inspection of approximately 127,000 linear feet (24 miles) of sewer mains, up to 125 private sewer laterals and 660 sewer manholes.

The contractor for the project responsible for the inspection of the sewer mains and laterals is Rapid Flow, Inc. of Revere, MA and the consultant for the project responsible for the inspection of the sewer manholes is Weston & Sampson. Work on the project began in March and is anticipated to be completed in September.

The Engineering Department prepared all contract documents, bid and awarded the contract, and performed all resident inspection and contract administration in-house.

This project is part of the overall Inflow and Infiltration reduction project currently underway. The findings of this project will be incorporated into our current rehabilitation contract (also awarded to Rapid Flow, Inc.) to remove extraneous clean water that enters the sanitary sewer system.
